

Cabinet door insert worksheet

A: Width	
B: Height	
C: Depth *	
Textured? **	

* The depth measurement refers to the space between the front of the glass, and the very front on the door face. This will help us determine what thickness of Faux Iron material to use.

Design	
Finish	
Quantity	

** Textured or frosted glass may prevent your Faux Iron insert from being seen in detail from the back. In this case, Double-Sided beveling is not necessary.

Unless otherwise noted, the manufacturer will take a small (1/8") deduction from the measurements listed on this approval form, for installation. If you do not want this deduction to be taken, please inform our order coordinator, and we will issue you a properly noted form.
