

How to Measure When Using Snug Seal™

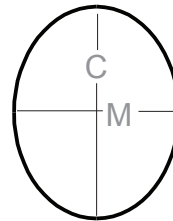

1. Select the shape of your window or niche
2. Measure the required vertical and horizontal dimensions for the selected shape
3. Round measurements to nearest 1/16"
4. For Center height place measuring tape at mid point of bottom sill
5. For Middle width place measuring tape at mid point of Center height. *For shapes having legs (Eyebrows with Legs and Half Eyebrows with Legs) utilize the inflection point (where leg meets curve) as the point from which to measure the Middle width.*

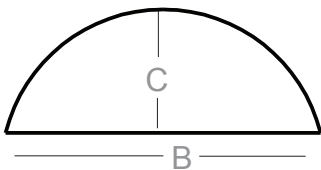

Squares and Rectangles (SS)

Circles and Ovals (CS)

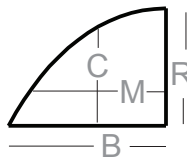

Half Circles and Eyebrows (YS)

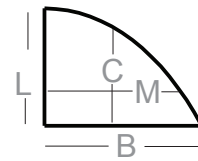

Half Eyebrows and Quarter Circles

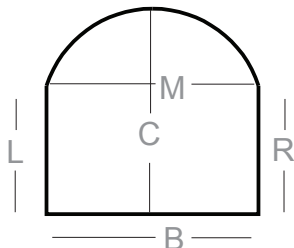

Left (YL)

Right (YR)

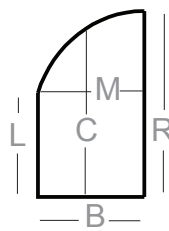

Eyebrows with Legs (BS)

Half Eyebrows with Legs
